

Lin Chen

Synthetic test candidate | Shanghai | lin.chen@example.invalid | +86 100 0000 0000

SUMMARY

AI product manager with 4 years of fictional experience turning user research and model capabilities into measurable workflow products. Skilled in product discovery, experiment design, analytics, and cross-functional delivery.

EXPERIENCE

Northstar Labs - AI Product Manager | 2023 - Present

- Led a document-assistant product from discovery to launch; defined evaluation metrics, feedback loops, and release criteria.
- Designed retrieval and answer-quality experiments that increased successful task completion from 62% to 81% in a synthetic benchmark.
- Coordinated engineering, design, and operations across three quarterly releases; maintained roadmap and risk register.

Harbor Commerce - Product Analyst | 2021 - 2023

- Built funnel dashboards and cohort analyses for merchant onboarding.
- Ran interviews with 30 fictional users and translated findings into prioritized requirements.
- Partnered with data science to validate recommendation experiments and guardrail metrics.

PROJECTS

Job Search Copilot - Product Lead

Created a local-first prototype for saving job descriptions, comparing role requirements with verified resume facts, and preparing structured interview practice. Defined privacy boundaries and human confirmation for external writes.

EDUCATION

Example University - B.Sc. Information Systems | 2017 - 2021

SKILLS

Product	Discovery, roadmaps, PRDs, experimentation, stakeholder alignment
Data	SQL, funnel analysis, cohort analysis, metric design
AI	LLM evaluation, retrieval workflows, prompt testing, safety guardrails
Languages	Mandarin (native), English (professional)
